Theory of Change and Logical Framework Design Training Course

Introduction

Strong proposals and successful programmes start with clear thinking about how change happens. Theory of change and the logical framework approach help organisations design projects with clear results, indicators and assumptions.

This course teaches participants to build theories of change and logframes, write SMART indicators and use them for proposals, monitoring and evaluation.

Learning Objectives

By the end of this course, participants will be able to:

- Explain theory of change and logical framework approaches
- Analyse problems and stakeholders
- Build a theory of change
- Design a logical framework with outputs, outcomes and impact
- Write SMART indicators and means of verification
- Use logframes in proposals and monitoring

Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Participants build a complete theory of change and logframe for a sample project.

Benefits for Your Organisation

- Stronger, more fundable proposals
- Clear, measurable project results
- Better monitoring and evaluation
- Improved learning and accountability

Benefits for You

- Practical project design skills
- Ability to write strong logframes
- Indicator writing skills
- Better proposal writing

Who Should Attend

This course is designed for:

- Programme and project managers
- Grants and proposal writers
- Monitoring and evaluation staff
- Non-profit managers
- Government and CSR programme teams

Course Outline

Day 1: Analysis

- Problem and stakeholder analysis
- Problem and objective trees
- Choosing strategies
- Theory of change concepts
- Assumptions and risks

Day 2: Design

- Building a theory of change
- Logical framework matrix
- Outputs, outcomes and impact
- SMART indicators
- Means of verification

Day 3: Using the Logframe

- Logframes in proposals
- Activity and resource planning
- Monitoring with logframes
- Adapting during implementation
- Group presentations
