Advanced Strategic Management Training Course

Introduction

Introduction

Strategic Management is all about identification and clear description of the strategies that managers/leaders can carry so as to accomplish better performance and a competitive advantage for their organization. An organization is said to have competitive, viable and economical advantage if its profitability is higher than the average profitability for all companies in its industry.

What is Strategic Management and Why is it Important? Strategic management can also be described as a bundle of decisions and acts which a manager undertakes, and which decides the result of the firm's performance. The manager must have comprehensive knowledge and analysis of the general and competitive organizational environment so as to take correct decisions.

They should conduct a SWOT Analysis (Strengths, Weaknesses, Opportunities, and Threats), i.e., they ought to make best possible utilization of strengths, reduce the organizational weaknesses, make use of arising opportunities and prospects from the business environment and shouldn't ignore or disregard threats.

This Xcelerate Training Institute Course on Advanced Strategic Management is nothing but planning, preparing and forecasting for all foreseeable, predictable as well as unfeasible contingencies. It is best suited, relevant and appropriate to both small as well as big organizations as even the smallest organization face competition/rivalry and, by formulating and implementing appropriate strategies, they can accomplish sustainable competitive advantage.
