Contractor Safety Management (CSM) Training Course

Introduction

Organizations have a legal obligation to manage and maintain the health and safety of their contractors and any other stakeholders who could be impacted by the processes of the company. Contractors also have responsibilities to make sure that everyone understands the part they need to play in ensuring health and safety in their respective environments.

Poor management of health and safety protocols can lead to ill health, injuries, medical and legal costs, process delays, and damaged reputations. Therefore, companies must work closely with their contractors to reduce the risks to their employees and contractors.

What is Contractor Safety Management? Contractor safety management is an assortment of management processes that are used to limit the potential risks that could arise by working with contractors.

Why is it necessary to have Contractor Safety Management? Contractors must be informed, assessed, and to ensure their performance does not harm your business.

The actual performance of a contractor needs to match their stated intentions, otherwise, the statements and documents provided within any completed tender are futile and meaningless, leaving your organization and its reputation at risk.

This Xcelerate Training Institute course will empower you with all the necessary skills to critically analyses a contractor before offering the work and making sure of achieving the highest performance with a low amount of risk.

Learning Objectives

Upon completing this Contractor Safety Management (CSM) Training Course successfully, participants will be able to:

- Prepare projects and select contractors
- Establish project interface agreements, documentation, and project plans
- Manage contractors' compliance with the HSE Project Plan
- Review and study the contractor management process in further detail
- Design client and contractor agreements and documentation
- Produce a client and contractor HSE Project Plan
- Supervise contractor's operations on a day-to-day basis
- Monitor and review a contractor's performance and execute any required enhancements

Training Methodology

This collaborative Contractor Safety Management (CSM) Training Course will comprise of the following training methods:

- Lectures

- Seminars & Presentations
- Group Discussions
- Assignments
- Case Studies & Functional Exercises

Just like all our Xcelerate Training Institute courses, this training program also follows the 'Do-Review-Learn-Apply' model.

Benefits for Your Organisation

- Benefit from improved contractor monitoring, control, and performance
- Your staff will be able to assess and validate contractor profiles before choosing the best personnel to work with
