Cost and Management Accounting Training Course

Introduction

Cost and Management Accounting is crucial for business owners and managers to understand revenues and costs, offering detailed insights into profits and losses across all sectors. Cost accounting helps accurately account for variable and fixed costs, essential for pricing and decision-making. Proper cost accounting allows organizations to evaluate strategies, conduct break-even analyses, and appraise investments. This enhances budgeting and decision-making processes driven by accurate cost estimation. Coupled with ERP systems, cost accounting supports financial planning, lean accounting, and resource allocation.

Learning Objectives

Participants completing this course will be able to:

- Understand the basics of Managerial Accounting and its differences from Financial Accounting.
- Utilize management reports for planning and monitoring.
- Determine appropriate levels for cost capture.
- Analyze variances between actual and budgeted or previous figures.
- Optimize working capital to prevent unnecessary fund blockage.
- Evaluate capital expenditure.

Training Methodology

This course includes:

- Lectures
- Seminars & Presentations
- Group Discussions
- Assignments
- Case Studies & Functional Exercises Following the ‘Do-Review-Learn-Apply’ model by Xcelerate Training Institute ensures an interactive and practical learning experience.

Benefits for Your Organisation

Organizations will gain:

- A better understanding of cost behavior for improved decision-making.
- Enhanced ability to plan and monitor performance.
- Improved working capital management.
- Insight into the flow of information in an ERP system.
- Skills to evaluate returns on capital expenditures and investment projects.

Benefits for You

Participants will gain:

- Understanding of the structure of the chart of accounts and reporting levels.

- Ability to differentiate between Financial and Management Accounts.
- Skills to use management accounts for segment reporting.
- Competence in preparing cash flow statements.
- Knowledge of the budget process and application of costing knowledge.
- Ability to calculate price, volume, and mix variances.
- Skills to compute break-even points and conduct sensitivity analysis.

Who Should Attend

This course is ideal for:

- Financial controllers, finance managers, financial systems analysts, senior and financial accountants.
- Management accountants.
- General ledger, accounts receivable, accounts payable, and payroll accountants.
- Decision-makers relying on timely and accurate financial information.
- CFOs, finance directors, and strategic planners.
