Designing for Office 365 Infrastructure

Introduction

This Office 365 training program focuses on designing infrastructure course by Xcelerate Training Institutes for large-scale corporate environments. Students will learn how to implement Office 365 using deployment, pilot, and enhancement phases. Upon completion, students will be able to plan Lync Federation and deploy Office 365 Pro Plus.

Learning Objectives

Upon completion, participants will be able to plan for email security integration, SharePoint customization, single sign-on, hybrid Exchange environments, and SharePoint development.

Training Methodology

This course provides a comprehensive approach to designing and implementing Office 365 infrastructure in large enterprise environments. It covers the Fast Track deployment methodology, allowing for a streamlined and efficient deployment process. Participants will gain hands-on experience through labs and a case study, learning to plan, design, and deploy Office 365 services, including Exchange Online, SharePoint Online, Teams, and One Drive for Business. The course also emphasizes security and compliance considerations, ensuring a robust and secure Office 365 environment.

Benefits for Your Organisation

Designing for Office 365 infrastructure offers numerous benefits for your organization, including enhanced productivity through cloud-based collaboration tools, improved security with advanced threat protection measures, reduced IT costs by eliminating the need for on-premises servers and software, seamless integration with Microsoft applications, and access to the latest features and updates without manual intervention.

Benefits for You

Designing for Office 365 infrastructure offers numerous benefits, including enhanced collaboration through tools like Teams, SharePoint, and One Drive, enabling seamless teamwork regardless of location. It provides anytime, anywhere access to essential tools and data, boosting productivity and flexibility. Additionally, Office 365 boasts enterprise-grade security features, safeguarding sensitive information and ensuring business continuity.

Who Should Attend

This Office 365 certification is designed for enterprise architects, IT professionals, and consultants involved in implementing enterprise communication and content sharing platforms for businesses.

Course Outline

Planning the Deploy Phase – Part 1

- Transitioning from the Pilot Phase to the Deploy Phase.
- Planning service selection, networking, domains, and user management.

Planning the Deploy Phase – Part 2

- Migrating email accounts, setting up SharePoint Online, and deploying Office 365 ProPlus.
- Introducing Lync Online.

The Office 365 Deployment Challenge

- Reviewing Office 365 features and recent improvements.
- Introducing the Fast Track Deployment Methodology.
- Identifying deployment challenges and benefits.

Planning the Enhance Phase – Part 1

- Implementing single sign-on and hybrid Exchange deployments.

Planning the Enhance Phase – Part 2

- Integrating Exchange Online Protection and customizing SharePoint Online.

Case Study

- Applying knowledge to create a design plan for a Fast Track deployment in a simulated customer environment.

Planning the Pilot Phase

- Overview of the Pilot Phase.
- Identifying prerequisites and planning for pilot users.
- Planning for team collaboration.
