Organizational Project Management Maturity Model (OPM3)

Introduction

OPM3 stands for Organizational Project Management Maturity Model, a globally acknowledged standard providing tools to measure organizational maturity against a comprehensive set of organizational best practices.

This leads us to wonder—what exactly project management maturity is? Project management maturity is the progressive development of an organization with respect to its project management approach, methodology, strategy, decision-making, etc.

Maturity levels vary across organizations depending on specific criteria such as goals, strategies, scope, requirements, etc. Besides OPM3, there are other maturity models available, one of them being the project excellence model (PEM). PEM is a good standard for measuring project success based on an analytical system of points assigned to various categories.

This Xcelerate training course will empower you with in-depth knowledge and understanding of project management maturity models, specifically OPM3 and PEM.

The skill and knowledge gained about maturity models will earn you the desired attention and acknowledgment of your skills and capabilities, and this will result in further opportunities in terms of higher roles and responsibilities in your organization and beyond.

Learning Objectives

- in-depth knowledge and understanding of project management maturity of an organization
- overall confidence, skill, and capability to help the organization align project management goals to organizational strategic objectives
- the required knowledge, awareness, and information of project management maturity models to be able to apply these to project management practices and processes
- the skill and experience to manage extremely complex and challenging projects and complete them
- confidence, experience, and information to make changes to project management systems and processes, thereby demonstrating skill and talent to undertake higher roles and responsibilities related to project management
- a sense of pride to contribute towards organizational growth and maturity through effective project management and completion of all projects on time
- the required skill, experience, and capability to gain credibility as a project management professional, thereby increasing revenues for growth and progression
- the knowledge and exposure to cover all important areas of a project, giving the right attention to the right aspect at the right time

Training Methodology

All courses at Xcelerate Training Institute are devised to address a specific topic and appeal to the relevant audience in terms of their job profiles and professional experience. Each course is thoroughly reviewed before each training session to check and make changes, if any, to suit the audience.

Benefits for Your Organisation
