Safety Audit and Safety Inspection Training Course

Introduction

Introduction

Safety inspections and audits are a critical part of a comprehensive safety and health program in which the workplace is evaluated closely on a regular basis. Both quantitative and qualitative audits are usually carried out to determine the effectiveness of the health and safety systems at organizational levels, or for specific branches and projects.

This course focuses on these types of inspections and regular planned inspections of critical parts of a machine, and any piece of equipment or system which have a high potential to cause serious accidents.

How is this “Safety Audit and Safety Inspection Certification Training Course” beneficial to all safety personnel? Regardless of whether they conduct audits or face them, the best part about this course is that it not only covers the material from the point of view of safety auditors but also those who may potentially face such audits. This enables both parties to be prepared and well-informed about the elements involved in safety inspections.

This Xcelerate Training Institute course will empower you with the knowledge to work with little or no supervision while managing the safety programs, policies, and procedures common to your business and industry.

Learning Objectives

- Recognize the purpose and benefits of safety inspections
- Study how to plan and execute an effective and beneficial safety inspection
- Practice how to use checklists to save time and improve inspection quality
- Classify and document potential and actual hazards related to facilities and equipment
- Detect and report any hazards which necessitate immediate consideration
- Determine whether existing hazard controls are functioning adequately and recommend corrective actions when necessary
- Understand how to communicate results
- Develop recommendations and follow-up on implementation plans

Training Methodology

This collaborative Safety Audit and Safety Inspection Certification Training Course will comprise the following training methods:

- Lectures
- Seminars & Presentations
- Group Discussions
- Assignments
- Case Studies & Functional Exercises

Benefits For Your Organization

- Have your employees better equipped to carry out effective site inspection
- Benefit from training your employees on the definition and importance of safety information, along with the different roles played in the Safety Audit and Safety Inspection guidelines
- Document your Safety Audit and Safety Inspection information systematically and efficiently with enhanced communications and improved safety behavior
- Improve productivity by teaching your staff about the Safety Audit and Safety Inspection work process and how it fits into the overall organizational work processes
- Achieve improved Safety Audit and Safety Inspection, higher employee morale, increased productivity, lower number of incidents, and reduced costs of damage control
- Assess your Safety Audit and Safety Inspection rating by evaluating its effectiveness to reduce injuries and illnesses and identifying and eliminating workplace hazards

Benefits For You

- Improve your performance through higher efficiency and greater worker productivity by being aware of Safety Audit and Safety Inspection related risks
- Recognize the importance of human factors and safety culture
- Engage in conversations about Safety Audit and Safety Inspection, leading to improved occupational safety and better overall communication
- Learn how to perform a Safety Audit and Safety Inspection study from experienced professionals: collecting information, selecting the team, leading a meeting, and documenting the results
- Focus on human factors issues to analyze Safety Audit and Safety Inspection procedures in areas such as start-up, shutdown, and maintenance
- Get an opportunity to work through hands-on exercises in detail to gain the skills needed to facilitate a Safety Audit and Safety Inspection study
- Gain the skills to plan, manage, facilitate, and scribe for a Safety Audit and Safety Inspection study

Target Audience

- Industrial safety and health inspectors
- Trainers of industrial safety and health inspectors
- Engineers
- HSE Personnel
- Maintenance Personnel
- Employee Representatives
- Human Resources Professionals
- Line Managers
- Supervisors
- Team Leaders
- All personnel involved in selecting equipment, premises, etc.
