ESG and IFRS S1/S2 Sustainability Reporting Training Course

Introduction

Sustainability reporting is moving from voluntary brochures to regulated, audited disclosures. The ISSB standards IFRS S1 and IFRS S2 are being adopted across the world and in the Gulf, where listed companies, banks and insurers face new requirements from 2026.

This course explains how to prepare sustainability and climate disclosures in line with IFRS S1 and S2, and how they connect with GRI, SASB and the EU CSRD. Participants learn materiality, governance, risk management, metrics and targets, and how to organise data, processes and assurance.

Learning Objectives

By the end of this course, participants will be able to:

- Explain the global and Gulf sustainability reporting landscape
- Apply the requirements of IFRS S1 and IFRS S2
- Identify material sustainability and climate-related risks and opportunities
- Prepare disclosures on governance, strategy, risk management, metrics and targets
- Connect sustainability reporting with financial reporting
- Build data processes and prepare for external assurance

Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Participants draft sample disclosures for a case company and review real Gulf and international sustainability reports.

Benefits for Your Organisation

- Readiness for mandatory sustainability reporting
- Better access to investors and financing
- Stronger management of climate and ESG risks
- Credible, assurance-ready disclosures
- Alignment between finance and sustainability teams

Benefits for You

- Expertise in a fast-growing reporting area
- Practical knowledge of IFRS S1 and S2
- Ability to lead reporting projects
- Understanding of GRI, SASB and CSRD links

- Strong career positioning in finance and sustainability

Who Should Attend

This course is designed for:

- Finance and financial reporting managers
- Sustainability and ESG managers
- Investor relations professionals
- Risk managers and internal auditors
- Board and audit committee members

Course Outline

Day 1: The Sustainability Reporting Landscape

- From voluntary ESG reports to mandatory disclosure
- ISSB, GRI, SASB, TCFD and CSRD explained
- Adoption of ISSB standards in the Gulf
- Investor expectations and ESG ratings
- Roles of finance and sustainability teams

Day 2: IFRS S1 General Requirements

- Core content: governance, strategy, risk management, metrics and targets
- Materiality and sustainability-related risks and opportunities
- Connected information with financial statements
- Reporting entity, timing and comparatives
- Transition reliefs

Day 3: IFRS S2 Climate-Related Disclosures

- Physical and transition climate risks
- Climate scenario analysis
- Greenhouse gas emissions disclosures
- Industry-based metrics
- Climate targets and transition plans

Day 4: Data, Processes and Controls

- Sustainability data collection and systems
- Internal controls over sustainability information
- Estimates, judgements and uncertainty
- Preparing for limited and reasonable assurance
- Reporting calendar and governance

Day 5: Implementation Roadmap

- Gap analysis against IFRS S1 and S2
- Project planning and resources

- Communicating with investors and stakeholders
- Lessons from early adopters
- Your implementation plan
