AGRIBUSINESS SUSTAINABILITY

Net-Zero and Decarbonisation Strategy for Industry Training Course

Practical Pathways to Lower Emissions in Energy-Intensive Operations

DURATION	LANGUAGE	FORMAT	COURSE CODE
5 days	English or Arabic	Classroom / Online	ME-101

Upcoming dates

Dates	Venue	Format	Fee
22 – 26 Feb 2027	Kuala Lumpur	Classroom	€5,500
5 – 9 Apr 2027	London	Classroom	€4,800
14 – 18 Jun 2027	Madrid	Classroom	€4,800
16 – 20 Aug 2027	Manama	Classroom	€3,800
25 – 29 Oct 2027	Paris	Classroom	€4,800
6 – 10 Dec 2027	Singapore	Classroom	€5,500

Net-Zero and Decarbonisation Strategy for Industry Training Course

Introduction

Industrial companies in oil and gas, petrochemicals, cement, steel, aluminium and utilities face growing pressure to cut emissions while staying competitive. Gulf countries have announced net-zero targets, and major buyers and investors expect credible decarbonisation plans.

This course explains the technical and economic options for industrial decarbonisation, from energy efficiency and electrification to hydrogen, carbon capture and renewable power, and shows how to build a realistic, costed net-zero roadmap.

Learning Objectives

By the end of this course, participants will be able to:

- Understand net-zero targets and their implications for industry
- Assess the emissions profile of industrial operations
- Evaluate decarbonisation technologies and their costs
- Use marginal abatement cost curves to prioritise actions
- Build a costed decarbonisation roadmap
- Manage implementation, financing and reporting

Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Participants analyse industrial case studies and build a decarbonisation roadmap for a sample facility.

Benefits for Your Organisation

- A credible, costed decarbonisation plan
- Lower energy costs through efficiency
- Reduced exposure to carbon pricing and regulation
- Improved access to green finance and customers
- Engineering teams aligned on net-zero priorities

Benefits for You

- Broad understanding of decarbonisation technologies
- Tools to evaluate and prioritise projects
- Ability to contribute to net-zero strategy
- Knowledge of regional energy transition plans
- Strong positioning for energy transition roles

Who Should Attend

This course is designed for:

- Engineers and engineering managers
- Energy and sustainability managers
- Operations and plant managers
- Strategy and business development professionals
- Project and investment analysts

Course Outline

Day 1: The Net-Zero Context

- Climate targets and national net-zero commitments in the Gulf
- Industrial emissions sources
- Carbon pricing and border adjustment mechanisms
- Customer and investor pressures
- Baseline emissions assessment

Day 2: Efficiency and Electrification

- Energy audits and efficiency measures
- Heat recovery and process optimisation
- Electrification of heat and drives
- Renewable power supply and power purchase agreements
- Flaring and methane reduction

Day 3: Low-Carbon Fuels and Technologies

- Hydrogen and its derivatives
- Carbon capture, utilisation and storage
- Biofuels and alternative feedstocks
- Circular economy and material efficiency
- Technology readiness and risk

Day 4: Economics and Prioritisation

- Marginal abatement cost curves
- Capital and operating cost analysis
- Green finance and incentives
- Carbon credits and offsets
- Prioritising the project portfolio

Day 5: Roadmap and Implementation

- Building the decarbonisation roadmap
- Governance and accountability
- Monitoring and reporting progress
- Engaging employees and suppliers

- Action plan for your facility
