Sustainable Procurement Training Course

Introduction

Up to 90% of an organisation's environmental and social impact can sit in its supply chain. Customers, investors and regulators increasingly expect organisations to buy responsibly, report supplier emissions and manage human rights risks.

This course shows procurement professionals how to integrate sustainability into policies, category strategies, tenders, supplier evaluation and contract management, in line with ISO 20400 guidance and public procurement practice.

Learning Objectives

By the end of this course, participants will be able to:

- Explain the business case and principles of sustainable procurement
- Apply ISO 20400 guidance to procurement processes
- Identify sustainability risks and opportunities by category
- Include sustainability criteria in specifications and tenders
- Evaluate and develop suppliers on ESG performance
- Measure and report sustainable procurement results

Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Participants build sustainable sourcing criteria for real procurement categories.

Benefits for Your Organisation

- Lower supply chain ESG risks
- Progress on emissions and sustainability targets
- Better supplier relationships and innovation
- Compliance with customer and regulatory demands
- Enhanced reputation

Benefits for You

- Practical sustainable procurement tools
- Knowledge of ISO 20400
- Ability to write sustainability criteria
- Up-to-date procurement skills
- Contribution to your organisation's ESG goals

Who Should Attend

This course is designed for:

- Procurement and purchasing professionals
- Category managers and buyers
- Supply chain managers
- Sustainability managers
- Public procurement officials
