OHSAS 18001 Occupational Health and Safety Management Awareness Training Course

Introduction

Introduction

To begin, what are OHS management systems? OHS refers to occupational health and safety management systems, specifically OHSAS 18001. OHSAS 18001 is an international standard providing a framework to identify, control and reduce health- and safety-associated risks of employees.

It aims at protecting employees from risks of occupational hazards and reducing the chances of accidents at the workplace. Getting certified under OHSAS 18001:2007 offers an organization an enhanced corporate image and credibility.

Further, considering that it is an international standard, the organization gains employees' trust with regard to the organization's intentions to safeguard their health and safety through the establishment of OHS management systems.

OHS management systems are implemented by various organizations and help limit legal risks as well as regulatory and compliance-related issues regarding employee health and safety.

This Xcelerate Training Institute course will empower you with complete understanding and knowledge of OHS management systems and their benefits to organizations.

Through this course, you will be equipped to play an instrumental role in setting up and managing OHS management systems in your organization. This, in turn, will provide you with the appropriate platform and opportunities to demonstrate your talent and potential, inviting higher roles and responsibilities and fostering growth and development within the organization.

Learning Objectives

- complete information, knowledge and awareness of OHS management systems, specifically OHSAS 18001
- the adequate skill, capability and experience of international standards for OHS management systems, thus increasing opportunities for related roles in other organizations or industries
- the confidence to train and spread awareness regarding OHS management systems among other professionals
- the skill, experience and knowledge to audit OHS management systems and make relevant changes to comply with international standards and guidelines
- the experience, exposure, confidence and skill to partake in or independently drive efforts to obtain the OHSAS 18001 certification for the organization, thus demonstrating potential and inviting further growth opportunities as well as increasing organizational credibility and dependability
- a sense of satisfaction and contentment to contribute to framing guidelines and policies and devising management systems to safeguard the health and safety of colleagues at the workplace

- the required foresight and perspective to anticipate occupational risks related to employee health and safety and devise and implement measures to safeguard these

Training Methodology

Training at Xcelerate Training Institute Talent Solutions is delivered through lectures by an expert in the relevant domain. The trainer uses detailed audio-visual presentations for ease of reference. Trainee participation is encouraged through group discussions, assignments, competitions, etc.

Role-plays also help in the practical aspect of training. Relevant case studies are also discussed in detail by the trainer. For further help and reference, the trainer encourages trainees to share related experiences and issues they face at work, and these are discussed in detail with the rest of the training audience.

This course follows a format typical to Xcelerate Training Institute Talent Solutions, called the Do–Review–Learn–Apply Model.

Benefits For Your Organizational

- Trained and experienced employees to partake or independently drive formation and management of OHS management systems within the organization
- Training of other employees regarding OHS management systems and the need to adhere to safety and health guidelines therein
