# Sustainable and Green Finance Training Course

## Introduction

Sustainable finance is one of the fastest-growing areas of global and Gulf capital markets. Governments, banks and corporates are issuing green bonds and sustainable sukuk, and lenders are integrating ESG and climate risk into credit and investment decisions.

This course explains the instruments, frameworks and practices of sustainable finance, including green, social and sustainability-linked bonds and loans, sustainable sukuk, ESG integration and climate risk management in financial institutions.

## Learning Objectives

By the end of this course, participants will be able to:

- Explain the sustainable finance landscape and key frameworks
- Describe green, social and sustainability-linked instruments
- Understand the structure of green bonds and sustainable sukuk
- Integrate ESG factors into credit and investment analysis
- Assess climate-related financial risks
- Avoid greenwashing in sustainable finance products

## Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Participants analyse real issuance frameworks from the Gulf and apply ESG criteria to investment cases.

## Benefits for Your Organisation
