Integrated Management Systems Internal Auditor Training Course

Introduction

Many organisations run combined quality, environmental and occupational health and safety management systems to reduce duplication and cost. Auditing these integrated systems requires auditors who understand all three standards and how they connect.

This course trains participants to audit integrated management systems based on ISO 9001, ISO 14001 and ISO 45001, following ISO 19011 guidance: planning, conducting, reporting and following up audits efficiently.

Learning Objectives

By the end of this course, participants will be able to:

- Explain the common structure of ISO 9001, ISO 14001 and ISO 45001
- Understand the specific requirements of each standard
- Plan integrated internal audits using ISO 19011
- Conduct audits, interviews and evidence collection
- Write clear audit findings and reports
- Follow up corrective actions effectively

Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Participants practise integrated audits through role plays and case-based exercises.

Benefits for Your Organisation

- Efficient audits of integrated systems
- Reduced audit duplication and cost
- Better compliance across quality, environment and safety
- Trained internal auditor team
- Readiness for external certification audits

Benefits for You

- Knowledge of three key ISO standards
- Practical audit skills
- Audit checklists and report templates
- Recognised internal auditor competence
- Broader career opportunities in QHSE

Who Should Attend

This course is designed for:

- QHSE managers and coordinators
- Internal auditors
- Quality, environmental and safety officers
- Process owners
- Management system representatives

Course Outline

Day 1: Integrated Management Systems

- Benefits of integration
- Harmonised structure of ISO standards
- Context, leadership and planning across systems
- Risks and opportunities
- Documented information

Day 2: Specific Requirements

- ISO 9001 quality requirements
- ISO 14001 environmental aspects and compliance
- ISO 45001 hazards and worker participation
- Operational controls
- Emergency preparedness

Day 3: Audit Planning

- ISO 19011 principles
- Audit programmes and objectives
- Integrated audit plans
- Checklists and sampling
- Auditor competence and conduct

Day 4: Conducting Audits

- Opening meetings
- Interviews and observation
- Collecting and verifying evidence
- Role-played integrated audit
- Closing meetings

Day 5: Reporting and Follow-Up

- Writing nonconformities
- Audit reports
- Corrective action and verification
- Measuring audit effectiveness

- Final assessment
