Negotiation Skills Training Course

Introduction

Every manager negotiates: with clients, suppliers, partners, colleagues and their own teams. Skilled negotiators reach better agreements faster while protecting relationships; unskilled ones leave value on the table or create conflict.

This practical course teaches proven negotiation frameworks and techniques, from thorough preparation and understanding interests to influencing, handling tactics and closing deals, including negotiation across cultures in the Gulf and international business.

Learning Objectives

By the end of this course, participants will be able to:

- Prepare negotiations systematically
- Distinguish positions from interests and create options
- Use BATNA, reservation points and anchoring effectively
- Apply persuasion and influencing techniques
- Recognise and respond to difficult tactics
- Negotiate effectively across cultures

Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Most of the course is spent on negotiation simulations with structured feedback.
