Key Account Management Training Course

Introduction

In many businesses a small number of key customers generate most of the revenue and profit. Managing these accounts strategically, rather than reacting to orders, protects revenue and opens new growth opportunities.

This course teaches participants how to select and analyse key accounts, build account plans, map and influence decision makers, create value propositions, negotiate and measure account profitability and growth.

Learning Objectives

By the end of this course, participants will be able to:

- Identify and prioritise key accounts
- Analyse customer businesses and needs
- Build strategic account plans
- Map and influence decision-making units
- Develop value propositions and solutions
- Measure account performance and profitability

Training Methodology

This course combines short expert presentations with practical exercises, case studies from the Gulf and international organisations, group discussions and work with real templates and tools. Participants are encouraged to bring examples from their own work so that the learning can be applied immediately.

Participants develop an account plan for one of their own key customers during the course.

Benefits for Your Organisation

- Protected and growing key account revenue
- Deeper, longer customer relationships
- Higher customer profitability
- Consistent account management approach
- Better sales forecasting

Benefits for You

- A strategic approach to customer management
- Account planning tools
- Influencing and negotiation skills
- A ready account plan for your customer
- Career progression in sales leadership
